

AuroDigi

**Unified Experience.
Future-ready
Solutions.**

AuroDigi Digital Banking Engagement Platform

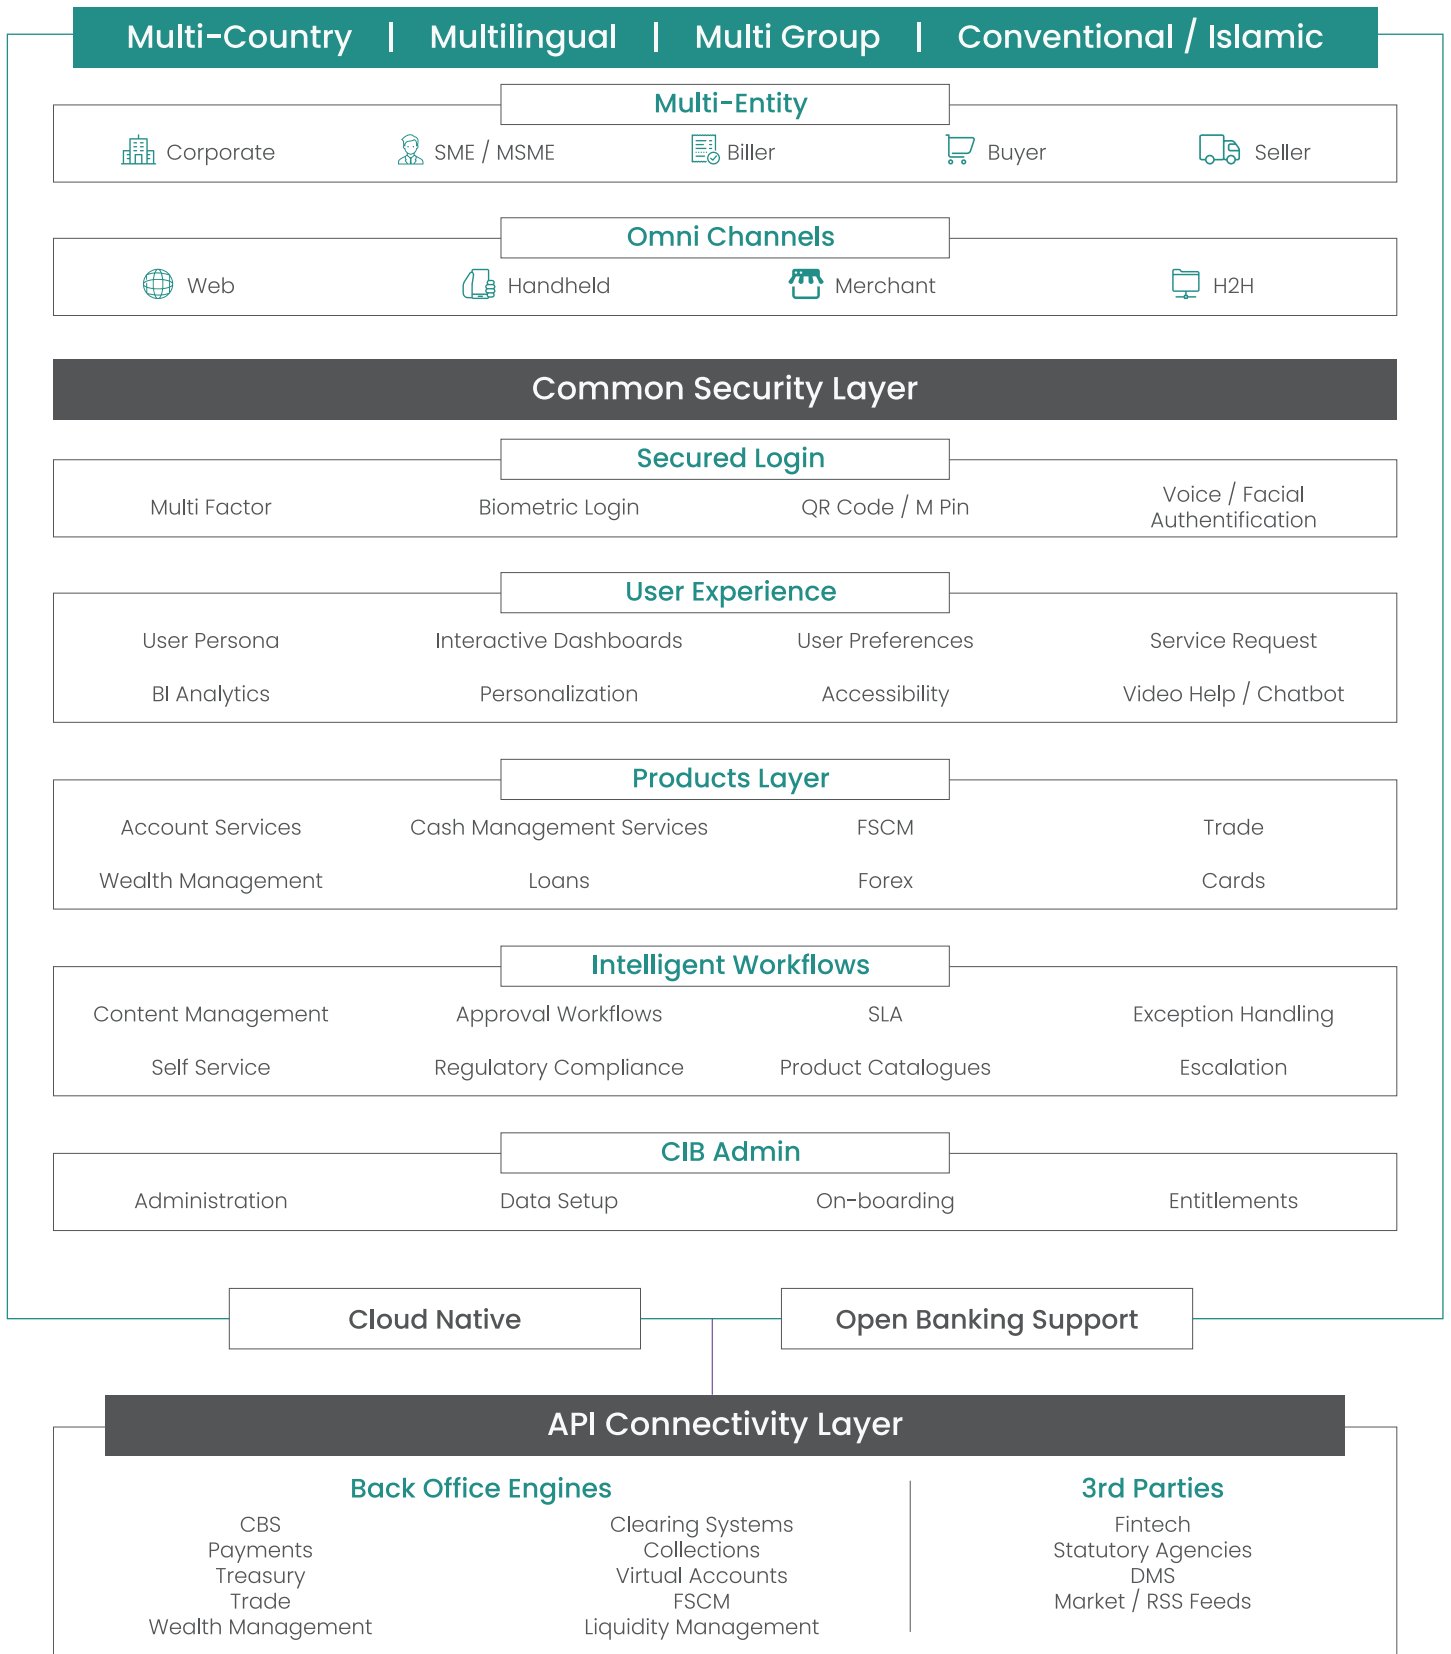

Welcome to AuroDigi, a one-stop solution for banks to provide a unified experience to corporate customers. AuroDigi delivers a complete digital banking platform for your Wholesale Banking Services and is built with the latest technology that promises reliability, security and configurability for both the bank and the customer.

Overview of AuroDigi's Wholesale Banking Portal.

Handles 6000+ concurrent users and 5 million+ transactions per hour.

Built on an API-first Architecture, AuroDigi is designed to handle huge volumes of transactions and can be connected to multiple backend systems for processing.

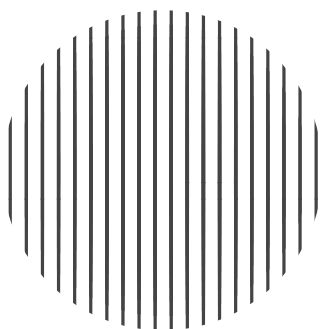

Tailored for Banks. Personalised for Businesses.

Deliver greater customer satisfaction through configurability.

AuroDigi is designed with a user-centric approach and promises to deliver a unified customer experience. Mapped with more than 500 user journeys, it covers different customer stages, personas and touchpoints that span the full complexity of wholesale banking. Every customer journey reflects consistent communication and offerings no matter which channel the customer chooses.

There are interactive dashboards, personalisation and customisation capabilities at various levels that can be tailored to meet the requirements of both the bank and the customer.

Personalised Interface

Banks can personalise the application and interface elements to match the **corporate identity and branding of the bank**. Corporate customers too can customise their dashboard and configure **quick links** for instant access to features and frequently used pages.

Persona-based Dashboards

The dashboard is built to deliver a seamless customer experience for **various personas**, from SME owners to CFOs of large multinational companies, bank relationship managers to business heads, or on-boarding staff to call centre personnel. It is embedded with **task-based widgets** based on the role and responsibilities of the user.

Designers and Configurators

The **dynamic form designer** allows banks to customise or **design documents** according to the bank's regulations and preference. Customers are also given **configuration abilities on the app** to make their user journey more seamless.

Preferred Support Channels

Built-in support channels allow banks and customers to define their preferred communication method which includes **video chat, AI chatbot, live chat** and **screen sharing**.

Built-in Solutions. Integrated Effortlessly.

Implement features easily to dramatically reduce time and cost.

Through AuroDigi's platform, corporate customers can take initiative to configure their account as needed with self-manage capabilities. Banks can introduce and manage this option through service request configuration which helps reduce time to market.

Self-service Capabilities

Through service request configuration, customers can modify and manage their existing services without any technical knowledge or without relying on relationship managers. Some of the key self-services capabilities for customers are **product and service configuration, user management, limit management and notifications management.**

Intelligent and Dynamic Workflows

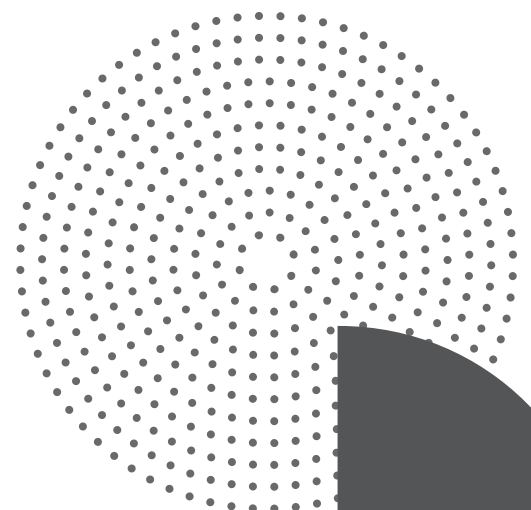

AuroDigi has the flexibility to dynamically map workflows. Banks can create templates to simplify the workflow process through **file mapper**, while customers can configure their required workflow easily to introduce various **approval matrices.**

Self-onboarding Capabilities

AuroDigi uses pre-defined templates to enable rapid onboarding for customers. This removes the need for extensive paperwork and reduces the load on the bank by using a **template-based process, automated process and flexible workflow.**

Content and Campaign Management

AuroDigi's **configurable content and campaign management** enables the bank to create targeted campaigns to **cross-sell or upsell** their services.

Digital Banking Scaled for Tomorrow.

Built for the future, so you can focus on the business today.

AuroDigi is a future-ready platform that can be scaled according to the bank's needs. It is ready to cater to the customers of today and tomorrow. Built with a modular approach, banks have the flexibility to introduce new features, products or services to corporate customers quickly and easily.

Modular Architecture

Scale products and services when needed or introduce new offerings effortlessly. The modular architecture brings **seamless connectivity** and allows banks to **continuously update** new features or products.

Intelligent Analytics

Predictive analytics driven by AI/BI help customers make informed decisions. AuroDigi is able to provide **contextual banking** information to corporate customers by relying on the customer's past banking activities using **AI/BI insights**.

Robust Security

AuroDigi provides robust security for corporate customers to do their transactions confidently. Security features include **biometric enabled login, multi-factor authentication** and **confidential information masking**.

Latest Technology

Ensuring AuroDigi is future-ready, the platform is built using the latest technology stack and has **microservices enabled, API-first architecture, progressive framework, container-based deployment** and is **cloud-native**.

One-stop Solution for Wholesale Banking.
